OVERVIEW

Academic Credit Bank is one of the steps taken by the UGC and Government of India to provide an autonomy to the students in the learning process. It facilitates the integration of the campuses and distributed learning systems. The bank will be rolled out from 2021-22 academic year provides a platform for the students to choose the best courses to suit their interest. It is high time that more teachers should develop MOOC courses and contribute to the national academic repository.

During Covid-19 Lock down period, the teaching, learning and assessment activities of higher education institutions was disrupted and it led to postponement of university examinations and eventually led to the rescheduling of the academic calendar. So it is high time to think about alternatives for the contact classes and assessment.

Learning Management System is the best alternative during situations like Lockdown and these LMS is also a supplement to the regular contact classes. So higher education teachers are in need of proper training in the development, installation and execution of online tools of pedagogy. This programme is intended to develop e-content and how to use Learning Management Systems to deliver and conduct MOOC courses.
